INDEX OF AUTHORS VOLUME 18

A

Afzelius, B. A. *see* Holley and Afzelius 521
Alexandre, C. *see* Chappard, Alexandre and Riffat 701
Allikmets, E. Yu. and Danilov, S. M. Mitogen-induced disorganization of capillary-like structures formed by human large vessel endothelial cells *in vitro* 481
Andres, G. *see* Caldwell, Brentjens, Camussi and Andres 809
Ashton, F. T. *see* Pepe, Ashton, Street and Weisel 499
Ausprunk, D. H. *see* Dethlefsen, Butterfield and Ausprunk 827

B

Basinger, S. F. *see* Lucas, Makunike, Basinger and Fliesler 241
Bergquist, P. R. *see* Lawson, Bergquist and Cambie 19
Bergtrom, G. *see* Seidman, Bergtrom, Gingrich and Remsen 395
—, *see* Seidman, Bergtrom and Remsen 407
Bernotat-Danielowski, S. and Knülle, W. Ultrastructure of the rectal sac, the site of water vapour uptake from the atmosphere in larvae of the oriental rat flea, *Xenopsylla cheopis* 437
Boniver, J. *see* Defresne, Goffinet and Boniver 321
Bouligand, Y. Theory of microtomy artefacts in arthropod cuticle 621
Brentjens, J. R. *see* Caldwell, Brentjens, Camussi and Andres 809
Brett, J. G. and Godman, G. C. Cytoskeletal organization affects cellular responses to cytochalasins: comparison of a normal line and its transformant 175
—, — and Miller, D. A. Phenotypic and karyotypic transitions in the spontaneous transformation of a rat cell line 27
Brigham, K. L. *see* Perkett, Disabato, Brigham and Meyrick 839
Brown, B. E. *see* Menon, Brown and Elias 71
Brown, M. R., Crim, J. W. and Lea, A. O. FMRFamide- and pancreatic polypeptide-like immunoreactivity of endocrine cells in the midgut of a mosquito 419
Butterfield, C.E. *see* Dethlefsen, Butterfield and Ausprunk 827

C

Caldwell, P. R. B., Brentjens, J. R. Camussi, G. and Andres, G. *In vivo* interaction of antibodies with cell surface proteins used as antigens 809
Callard, G. V. *see* Pudney and Callard 375
Cambie, R. C. *see* Lawson, Bergquist and Cambie 19
Cammarata, P. R., Cantu-Crouch, D., Oakford, L. and Morrill, A. Macromolecular organization of bovine lens capsule 83
Camussi, G. *see* Caldwell, Brentjens, Camussi and Andres 809
Cantu-Crouch, D. *see* Cammarata, Cantu-Crouch, Oakford and Morrill 83
Cavicchia, J. C. *see* Miranda and Cavicchia 461
Chamorro, C. A. *see* Paz, Chamorro, Fernandez and Villar 63
Chappard, D., Alexandre, C. and Riffat, G. Uncalcified cartilage resorption in human fetal cartilage canals 701
Cheng, M. *see* Nag and Cheng 491
Crawford, G. D. *see* Sattelle, Ho, Crawford, Salvaterra and Mason 51
Crim, J. W. *see* Brown, Crim and Lea 419

D

Danilov, S. M. *see* Allikmets and Danilov 481
Davis, W. L. and Goodman, D. B. P. Antidiuretic hormone response in the amphibian urinary bladder: time course of cytochalasin-induced vacuole formation, and ultrastructural study employing ruthenium red 685
Defresne, M. P., Goffinet, G. and Boniver, J. *In situ* characterization in freeze-fractured mouse thymuses of lymphoepithelial complexes ultrastructurally similar to isolated thymic nurse cells 321
Denefle, J.-P. and Lechaire, J.-P. Calcium-modulated desmosone formation and sodium-regulated keratinization in frog skin cultures 285
Dethlefsen, S. M. Butterfield, C. E. and Ausprunk, D. H. Structural changes induced in capillary endothelial cells by growth factors: altered distribution of cytoskeletal elements and organelles in cells spreading in the presence of tumor conditioned medium and hypothalamus derived growth factor 827
Ding, G. *see* Franki, Ding, Quintana and Hays 803
Disabato, G. *see* Perkett, Disabato, Brigham and Meyrick 839
Ditrich, H. Brain macrophages in cerebellar cell cultures 645
Doctor, J. *see* Fristrom, Doctor and Fristrom 531
Dougherty, M. M. *see* Dougherty, Dougherty and Harris 709
Dougherty, W. J., Dougherty, M. M. and Harris, S. G. Ultrastructural and histochemical observations

on electroejaculated spermatophores of the palaemonid shrimp, *Macrobrachium rosenbergii* 709
Duvert, M. and Savineau, J.-P. Ultrastructural and physiological studies of the contraction of the trunk musculature of *Sagitta setosa* (Chaetognath) 937
— *see* Savineau and Duvert 953

E

Elias, P. M. *see* Menon, Brown and Elias 71
Elofsson, R. *see* Nilsson, Hallberg and Elofsson 509

F

Fernandez, J. G. *see* Paz, Chamorro, Fernandez and Villar 63
Fliesler, S. J. *see* Lucas, Makunike, Basinger and Fliesler 241
Flower, N. E. Sealing junctions in a number of arachnid tissues 899
Franki, N., Ding, G., Quintana, N. and Hays, R. M. Evidence that the heads of ADH-sensitive aggrephores are clathrin-coated vesicles: implications for aggrephore structure and function 803
Fristrom, D., Doctor, J. and Fristrom, J. W. Procuticle proteins and chitin-like material in the inner epicuticle of the *Drosophila* pupal cuticle 531
Fristrom, J. W. *see* Fristrom, Doctor and Fristrom 531

G

Garrod, D. R. *see* Shellswell, Mattey and Garrod 659
Gilly, W. F. *see* Nevitt and Gilly 341
Gingrich, D. J. *see* Seidman, Bergtrom, Gingrich and Remsen 395

INDEX OF SUBJECTS VOLUME 18

A

α-tubulin 27
Absorptive epithelium, the virgin bursa copulatrix of the butterfly, *Calpodes* 545
Actin, in spontaneous transformation of a rat cell line 27
—, in mammary sperm after capacitation 887
—, -F, mesh, associated with the microtubule-rich core of an insect ovariole 753
Actomyosin, of pericytes 153
Agglutinin, -gold conjugate, as a specific electron dense marker 297
Aggrephores, evidence that the heads of ADH-sensitive, are clathrin-coated vesicles: implications for aggrephore structure and function 803
Amphibian, toad, effects of anti-diurectic hormone on the bladder of 803
—, *Xenopus*, cardiac muscle plasma membrane, developmental changes in P-face and E-face particle densities of 793
Angiogenesis, mitogen-induced disorganization of capillary-like structures formed by human large vessel endothelial cells *in vitro* 481
Annelid, *Lumbricus terrestris*, endodermal secretion of chitin in the 'cuticle' of the gizzard of 361
Antibodies, *in vivo* interaction of, with cell surface proteins used as antigens 809
—, monoclonal, to choline acetyltransferase, in central neurones of *Periplaneta americana* 51
Arachnid, tick, salivary glands, an immunocytochemical marker for the complex granules of 765
— tissues, sealing junctions in a number of 899
Ascidian, endostyle, cell shape, spatial patterns of cilia, and mucus-net construction in the 667
Autophagy, in mosquito fat body 125
Autoradiography, localization of the lipid intermediate pathway of protein glycosylation of oviduct cell types 241

B

Basal apparatus, ciliary, in immotile-cilia syndrome 521
— —, —, in the ascidian endostyle 667
— lamina, in embryonic chick corneal epithelium 659
— —, of bovine lens capsule 83
Blood–testis barrier, a permeability barrier in the testis of an insect *Triatoma:* a freeze-fracture and lanthanum tracer study 461
— vessel, invasion by mammary tumor cells, patterns of 817
Body wall, of adult *in utero* larvae and infective-stage larvae of *Trichinella* (Nematoda), a freeze-fracture study 219
Bursa copulatrix, the virgin bursa copulatrix of the butterfly, *Calpodes* 545

C

C-filaments, of the trunk musculature of *Sagitta setosa* (Chaetognath) 937
C1q, receptor-mediated binding of, on pulmonary endothelial cells 13
Cadmium, accumulation of, by the fourth instar larva of the fly, *Chironomus thummi* 395
—, sequestration, sites of, structure of the larval midgut of the fly, *Chironomus thummi* and its relationship to 407
Calcium, physiological and cytochemical studies of, in the primary muscle of the trunk of *Sagitta setosa* (Chaetognath) 953
—, pulse discharge of, through a demineralizing epithelium in the crustacean *Orchestia:* ultrastructural cytochemistry and X-ray microanalysis 267
Canals, cartilage, uncalcified cartilage resorption in human fetal 701
Cartilage, uncalcified, resorption in human fetal cartilage canals 701
Cell density, influence of plating density on individual cell growth, cell division and differentiation of neonatal rat heart primary cultures 209
— populations, pure, self-assembly of structures resembling functional organs by 313
Cestode, integument of the tapeworm scolex. 1. Freeze-fracture of the syncytial layer, microvilli and discoid bodies 869
Chaetognath, *Sagitta setosa*, physiological and cytochemical studies of Ca in the primary muscle of the trunk of 953
—, — —, ultrastructural and physiological studies of the contraction of the trunk musculature of 937
Chitin, endodermal secretion of, of the 'cuticle' of the earthworm gizzard 361
—, -like material in the inner epicuticle of the *Drosphila* pupal cuticle 531
—, localization of, in the cuticle of Tardigrada using wheat germ agglutinin-gold conjugate as a specific electron dense marker 297
Cholesteric liquid crystal, organization of cuticle 603
— organization, theory of microtomy artefacts in arthropod cuticle 621
Choline acetyltransferase, immunocytochemical staining of central neurones in *Periplaneta americana* using monoclonal antibodies to 51

Chorion, structure and formation of, in the butterfly, *Calpodes* 589
Cilia, cell shape, spatial patterns of, and mucus-net construction in the ascidian endostyle 667
—, -immotile, alignment of, in immotile-cilia syndrome 521
Circulatory system, leukocyte diapedesis and plasma extravasation after leukotriene B_4: lack of structural injury to the endothelium 1
— —, the pericyte—a review 153
Clathrin, -coated vesicles, evidence that the heads of ADH-sensitive aggrephores are: implications for aggrephore structure and function 803
Coated-vesicles, evidence that the heads of ADH-sensitive aggrephores are 803
—, in mosquito oocytes 559
Collagen-containing fibrils, in the egg case of the dogfish *Scyliorhinus caniculus*, a kinked molecular model for 201
Contractile proteins 27,175
Corneal epithelium, chick, hemidesmosome formation by embryonic, *in vitro* 659
Corpus luteum, formation and ovulation in the butterfly, *Calpodes* 783
Crinophagy, in mosquito fat body 125
Crustacean, barnacle, an electron microscopic study of a 'Sertoli-like' cell in the testis of 383
—, crab, direct visualization of microtomy artefacts in sections of twisted fibrous extracellular matrices, in cuticle of 603
—, decapod, *Scyllarus chacei*, sperm maturation and ultrastructure in 257
—, *Orchestia*, pulse discharge of calcium through a demineralizing epithelium in; ultrastructural cytochemistry and X-ray analysis 267
—, palaemonid shrimp, *Macrobrachium rosenbergii*, ultrastructural and histochemical observations on electroejaculated spermatophores of the 709
—, the ontogenetic development of refracting superposition eyes in: transformation of optical design 509
Cryofixation, of flagella of squid spermatozoon 251
Cryo-preservation, for SEM, avoids artefacts induced by conventional methods of specimen preparation 305
Crystallographic study, of yolk-platelet structure, of an ancient bony fish (*Acipenser*) and an ancient reptile (*Sphenodon*) 117
Cuticle, arthropod, theory of microtomy artefacts in 621
—, direct visualization of microtomy artefacts in sections of twisted fibrous extracellular matrices603
—, insect, temperature and the transpiration of water through the 99
—, of adult, *in utero* larvae and infective-stage larvae of *Trichinella* (Nematoda) 219
—, of Tardigrada, localisation of chitin in, using wheat germ agglutinin-gold conjugate as a specific electron dense marker 297
—, procuticle proteins and chitin-like material in the inner epicuticle of the *Drosphila* pupal cuticle 531
'Cuticle', of the earthworm gizzard, endodermal secretion of chitin in the 361
Cytochalasin, cytoskeletal organization affects cellular responses to: comparison of a normal line and its transformant 175
—, effects of, during spermiogenesis in the rat 887
—, -induced vacuole formation, antidiuretic hormone response in the amphibian urinary bladder: time course of 685
Cytoskeletal organisation, affects cellular responses to cytochalasins: comparison of a normal line and its transformant 175
Cytoskeleton, altered distribution of, in cells spreading in the presence of tumor conditioned medium and hypothalamus derived growth factor 827
—, modulation of, during insect follicle cell morphogenesis 741
—, phenotypic and karyotypic transitions in the spontaneous transformation of a rat cell line 27

D

DNA, synthesis of adult mammalian cardiac muscle cells in long-term culture 491
Demineralizing epithelium, pulse discharge of calcium through 267
Desmosome, formation, calcium-modulated, and sodium-regulated keratinization in frog skin cultures 295
Differentiation, of neonatal rat heart primary cultures 209
Discoid bodies, integument of the tapeworm scolex. 1. Freeze-fracture of the syncytial layer, microvilli and 869
Dogfish, *Scyliorhinus caniculus*, a kinked molecular model for the collagen-containing fibrils in the egg case of, 201
Dysplastic retina, external limiting membrane in developing 231

E

E–C coupling, in smooth muscle from a tunicate, *Ciona intestinalis* 341
e-granule, of tick salivary glands 765
Egg case, of the dogfish, a kinked molecular model for the collagen-containing fibrils in 201
Embryo, chick, quantitative ultrastructural changes of the endodermal cells in the early, analysed by stereological methods 63
Endocrine cells, in the midgut of a mosquito 419
Endocytosis, evidence that the heads of ADH-sensitive aggrephores are clathrin-coated vesicles: implications for aggrephore structure and function 803
—, receptor-mediated, in the mosquito oocyte 559
Endodermal cells, in the early chick embryo, quantitative ultrastructural changes of the, analysed by stereological methods 63
Endostyle, cell shape, spatial patterns of cilia, and mucus-net construction in the ascidian 667

Endothelial cells, capillary, structural changes induced in, by growth factors: altered distribution of cytoskeletal elements and organelles in cells spreading in the presence of tumor conditioned medium and hypothalamus derived growth factor 827
— —, human large vessel, mitogen-induced disorganization of capillary-like structures from by 481
— —, pulmonary, receptor-mediated binding of C1q on 13
Endothelium, lack of structural injury to, after leukotriene B_4 1
—, lymphocyte and granulocyte migration across the endothelial layer of bovine pulmonary artery intimal explants towards lymphocyte conditioned medium 839
—, pulmonary, *in vivo* interaction of antibodies with cell surface proteins in 809
—, receptor-mediated binding of C1q on pulmonary endothelial cells 13
Epicuticle, inner, of the *Drosphila* pupal cuticle, procuticle proteins and chitin-like material in 531
Epidermal differentiation, avian, role of lipids in permeability barrier formation of 71
Epidermis, avian, role of lipids in permeability barrier formation in 71
Eye, bovine lens capsule, macromolecular organization of 83
—, external limiting membrane in normal and dysplastic canine retina 231
—s, superposition, the ontogenetic development of refracting, in crustaceans: transformation of optical design 509

F

Fat body, of an insect, the development of the plasma membrane reticular system in the 853
— —, mosquito, lysosomes in the cessation of vitellogenin secretion by 125
Fatty acids, long chain, cellular localization of, in sponges 19
Fibrils, collagen-containing, in the egg case of the dogfish *Scyliorhinus caniculus*, a kinked molecular model for 201
Fibroblast, uncalcified cartilage resorption in human fetal cartilage canals 701
Fibronectin 27
Filaments, characterization of, within the subacrosomal space of rat spermatids during spermiogenesis 887
Fish, *Scyliorhinus caniculus*, a kinked molecular model for the collagen-containing fibrils in the egg case of the dogfish 201
—, spiny dogfish, *Squalus acanthias*, Sertoli cell cytoplasts in the semen of 375
—, teleost, *Acipenser*, yolk-platelet structure in 117
Flagella, of squid sperm, zipper-lines in the plasma membrane of 251
Follicle cell, insect, modulation of cytoskeletal organization during morphogenesis 741
Freeze-fracture, and lanthanum tracer study, of the permeability barrier in the testis of an insect, *Triatoma* 461
—, development changes in P-face and E-face particle densities of *Xenopus* cardiac muscle plasma membrane 793
—, *in situ* characterization in freeze-fractured mouse thymuses of lymphoepithelial complexes ultrastructurally similar to isolated thymic nurse cells 321
—, integument of the tapeworm scolex. 1. Freeze-fracture of the syncytial layer, microvilli and discoid bodies 869
—, sealing junctions in a number of arachnid tissues 899
—, study of the body wall of adult, *in utero* larvae and infective-stage larvae of *Trichinella* (Nematoda) 219
—, the external limiting membrane in developing normal and dysplastic canine retina 231
—, zipper-lines in the flagellar plasma membrane of the squid (*Loligo*) spermatozoon 251
— -substitution, effects of glycerol and freezing on the appearance and arrangement of microtubules in three different systems 331
Frog, skin cultures, calcium-modulated desmosome formation and sodium-regulated keratinization in 285

G

Glycerol, effects of, and freezing on the appearance and arrangement of microtubules in three different systems: a freeze-substitution study 331
Glycocalyx, *in vivo* interaction of antibodies with cell surface proteins used as antigens 809
Glycoprotein, biosynthesis, in oviduct cell types 241
Golgi apparatus, the obligatory final step for lipoprotein secretion by intestinal cells 447
Granulocytes, lymphocytes and, migration across the endothelial layer of bovine pulmonary artery intimal explants towards lymphocyte conditioned medium 839
Growth factors, structural changes induced in capillary endothelial cells by growth factors: altered distribution of cytoskeletal elements and organelles in cells spreading in the presence of tumor conditioned medium and hypothalamus derived growth factor 827

H

Heart, neonatal rat, differentiation of 209
Hemidesmosome, formation by embryonic chick corneal epithelium *in vitro* 659
Hindgut, of the oriental rat flea, *Xenopsylla cheopis*, water vapour uptake by 437

Hormone, antidiuretic, effects of a toad bladder 803
—, —, response in the amphibian urinary bladder: time course of cytochalasin-induced vacuole formation, an ultrastructural study employing ruthenium red 685
HVEM, patterns of blood-vessel invasion by mammary tumor cells 817
—, structural changes induced in capillary endothelial cells by growth factors: altered distribution of cytoskeletal elements and organelles in cells spreading in the presence of tumor conditioned medium and hypothalamus derived growth factor 827

I

Immotile-cilia syndrome, alignment of cilia in 521
Immunocytochemical marker, for the complex granules of tick salivary glands which traces e-granule shedding to interstitial labyrinthine spaces 765
Immunocytochemistry 27, 53, 83, 175
—, a new F-actin mesh associated with the microtubule-rich core of an insect ovariole 753
—, FMRFamide- and pancreatic polypeptide-like immunoreactivity of endocrine cells in the midgut of a mosquito 419
—, internalized proteins directed into accumulative compartments of mosquito ooctyes by the specific ligand, vitellogenin 559
—, *in vivo* interactions of antibodies with cell surface proteins used an antigens 809
Immunoreactivity, FMRFamide- and pancreatic polypeptide-like, of endocrine cells in the midgut of a mosquito 419
Insect, *Aedes aegypti,* FMRFamide- and pancreatic polypeptide-like immunoreactivity of endocrine cells in the midgut of 419
—, butterfly *Pieris brassicae,* origin of myoblasts involved in the formation of the flight muscles of 725
—, *Calpodes,* corpus luteum, formation and ovulation in 783
—, — structure and formation of the chorion in the butterfly 589
—, —, the development of the plasma membrane reticular system in the fat body of 853
—, —, the ovaries and changes in their structural components at the end of vitellogenesis and during vitelline membrane formation in the butterfly 575
—, —, the virgin bursa copulatrix of the butterfly 545
—, *Chironomus thummi,* accumulation of cadmium by the fourth instar larva of 395
—, — —, structure of the larval midgut of, and its relationship to sites of cadmium sequestration 407
—, cuticle, temperature and the transpiration of water through 99
—, *Drosphila,* procuticle proteins and chitin-like material in the inner epicuticle of 531
—, follicle cell morphogenesis, modulation of cytoskeletal organization during 741
—, fusion of myocytes with larval muscle remnants during flight muscle development in the Colorado beetle 469
—, *Glossina m. morsitans* (Diptera, Glossinidae), transport of perioxidase through the midgut epithelium of 429
—, mosquito, oocytes, internalized proteins directed
—,mosquito, lysosomes in the cessation of vitellogenin secretion in; selective degradation of Golgi complexes and secretory granules 125
—, —, oocytes, internalized proteins directed into accumulative compartments of, by the specific ligand, vitellogenin 559
—, *Notonecta,* effects of glycerol and freezing on the appearance and arrangement of microtubules in three different systems: a freeze-substitution study 331
of the rectal sac, the site of water vapour uptake from the atmosphere in larvae of 437
—, oviarole, nurse cell-oocyte interaction: a new F-actin mesh associated with the microtubule-rich core of an insect ovariole 753
—, *Periplaneta americana,* immunocytochemical staining of central neurones in, using monoclonal antibodies to choline acetyltransferase 51
—, sphecid wasp, fine structure and development of the large sensilla basiconica on the antennae of 143
—, *Triatoma,* a permeability barrier in the testis of: a freeze-fracture and lanthanum tracer study 46
Intercellular juctions, gap, in canine retina 231
— —, in arachnid tissues 899
— —, in the testis of a barnacle, *Balanus* 383
— —, in the testis of an insect, *Triatoma* 461
— —, tight, in canine retina 231
Intermediate filaments 27, 175
Intestinal cells, is the Golgi apparatus the obligatory final step for lipoprotein secretion by? 447
Invasion, patterns of blood-vessel, by mammary tumor cells 817

J

Junctions, intercellular, gap, in canine retina 231
— —, in the testis of a barnacle, *Balanus* 383
— —, in the testis of an insect, *Triatoma* 461
— —, sealing, in a number of arachnid tissues 899
— —, septate, in arachnid tissues 899
— —, tight, in arachnid tissues 899
— —, —, in canine retina 231

K

Karyotypic, and phenotypic transitions, in the spontaneous transformation of a rat cell line 27
Keratinization, sodium-regulated, in frog skin cultures 285

L

Lamellae, cuticular, direct visualization of microtomy artefacts in sections of twisted fibrous extracellular matrices in 603
—, —, theory of microtomy artefacts in 621
Lens capsule, bovine, macromolecular organization of 83
Leukocyte, diapedesis, and plasma extravasation after leukotriene B_4: lack of structural injury to the endothelium 1
Leukotriene B_4, leukocyte diapedesis and plasma extravasation after 1
Lipid, intermediate pathway of protein glycosylation of oviduct cell types, localization of 241
—s, role of, in permeability barrier formation, in avian epidermal differentiation 71
Lipoprotein secretion, is the Golgi apparatus the obligatory final step for, by intestinal cells? 447
Lipovitellin, similarity in yolk-platelet structure of an ancient bony fish (*Acipenser*) and an ancient reptile (*Sphenodon*) 117
Liquid crystal, cholesteric, organization of cuticle 603
Lymphocyte, and granulocyte migration across the endothelial layer of bovine pulmonary artery intimal explants towards lymphocyte conditioned medium 839
Lymphoepithelial complexes, *in situ* characterization in freeze-fractured mouse thymuses of, ultrastructurally similar to isolated thymic nurse cells 321
Lymphokines, effect of, on granulocyte migration 839
Lysosomes, in the cessation of vitellogenin secretion by the mosquito fat body; selective degradation of Golgi complexes and secretory granules 125

M

Macrophages, brain, in cerebellar cell cultures 645
—, in human fetal cartilage canals 701
Matrix proteins, macromolecular organization of bovine lens capsule 83
Metal-binding proteins, accumulation of cadmium by the fourth instar larva of the fly, *Chironomus thummi* 395
— —, structure of the larval midgut of the fly, *Chironumos thummi* and its relationship to sites of cadmium sequestration 407
Microfilaments 27, 175
Microtomy artefacts, direct visualization of, in sections of twisted fibrous extracellular matrices 603
— —, theory of, in arthropod cuticle 621
Microtubule, -rich core of an insect oviarole, nurse cell-oocyte interaction: a new F-actin mesh associated with the 753
—s, phenotypic and karyotypic transitions in the spontaneous transformation of a rat cell line 27
—, effects of glycerol and freezing on the appearance and arrangement of 331
—, in insect follicle cell morphogenesis 741
—, in the interfollicular bridge cells in the butterfly, *Calpodes* 575
Midgut, of the fly *Chironomus thummi*, accumulations of cadmium in 395
—, —, structure of, and its relationship to sites of cadmium sequestration 407
—, of tsetse fly, transport of peroxidase through 429
Mitogen, -induced disorganization of capillary-like structures formed by human large vessel endothelial cells *in vitro* 481
Mollusc, opisthobranch, *Runcina*, ultrastructural study of oogenesis and yolk formation in 915
Monoclonal antibodies, to choline acetyltransferase, immunocytochemical staining of central neurones in *Periplaneta americana* using 51
Monospecific antiserum, for the complex granules of tick salivary glands which traces e-granule shedding to interstitial labyrinthine spaces 765
Morphometry, quantitative ultrastructural changes of the endodermal cells in the early chick embryo analysed by 63
Mucus-net, cell shape, spatial patterns of cilia and, in the ascidian endostyle. 667
Muscle, cardiac, adult mammalian, DNA synthesis in 491
—, —, plasma membrane, developmental changes in P-face and E-face particle densities of *Xenopus* 793
—, flight, of a butterfly (*Pieris brassicae*), origin of myoblasts involved in the formation of 725
—, from the tunicate *Ciona intestinalis:* parallels with vertebrate skeletal muscle, morphological and physiological properties of 341
—, larval, fusion of myocytes with, during flight muscle development of the Colorado beetle 469
—, primary, of the trunk of *Sagitta setosa* Chaetognath, physiological and cytochemical studies of Ca in the 953
—, —, of the trunk of *Sagitta setosa* Chaetognath, ultrastructure of 937
—, the myosin filament X. Observation of nine subfilaments in transverse sections 499
Myoblasts, origin of, involved in the formation of the flight muscles of a butterfly (*Pieris brassicae*) 725
Myocyte, DNA synthesis of adult mammalian cardiac muscle cells in long-term culture 491
—, fusion of, with larval muscle remnants during flight muscle development in the Colorado beetle 469
Myogenesis, of flight muscle in the Colorado beetle 469
—, of flight muscles of a butterfly 725
Myosin filament, observation of nine subfilaments in transverse sections 499

N

Nematode, *Trichinella*, a freeze-fracture study of the body wall of adult, *in utero* larvae and infective-stage larvae of 219
Nervous system, brain macrophages in cerebellar cell cultures 645
— —, immunocytochemical staining of central neurones in *Periplaneta americana* using monoclonal antibodies to choline acetyltransferase 51

— —, myoneural junctions, in developing flight muscle of a butterfly *Pieris brassicae* 725
— —, sensory, fine structure and development of the large sensilla basiconica on the antennae of sphecid wasps 143
Neuromuscular junction, in tunicate smooth muscle 341
Neurones, central, in *Periplaneta americana*, immunocytochemical staining of 51
Nurse cell-oocyte, interaction: a new F-actin mesh associated with the microtubule-rich core of an insect ovariole 753

O

Oenocytes, plasma membrane reticular system in 853
Olfactory sensilla, antennal, of wasps 143
Ommatidia, of refracting superposition eyes in crustaceans 509
Oocyte, similarity in yolk-platelet structure of an ancient bony fish (*Acipenser*) and an ancient reptile (*Sphenodon*) 117
Oogenesis, and yolk formation in an opisthobranch mollusc, *Runcina*, ultrastructural study of 915
Organ culture, frog skin, desmosome formation and sodium-regulated keratinization in 285
Organogenesis, self-assembly of structures resembling functional organs by pure populations of cells 313
Ovalbumen 241
Ovariole, insect 753
Oviduct, localization of the lipid intermediate pathway of protein glycosylation in 241

P

Pericyte, a review 153
Peritrophic membrane, in the midgut of tsetse fly 429
Permeability barrier, role of lipids in formation of, in avian epidermal differentiation 71
Peroxidase, transport of, through the midgut epithelium of *Glossina m. morsitans* (Diptera, Glossinidae) 429
Plasma membrane, reticular system, in the fat body of an insect, the development of 853
Procuticle, proteins, and chitin-like material in the inner epicuticle of the *Drosphila* pupal cuticle 531
Protofilaments, of microtubules 331
Pulmonary artery, bovine, lymphocyte and granulocyte migration across the endothelial layer of 839

R

Receptor-mediated binding, of C1q on pulmonary endothelial cells 13
Rectal sac, the site of water vapour uptake from the atmosphere in larvae of the oriental rat flea, *Xenopsylla cheopis*, ultrastructure of 437
Reproductive system, a kinked molecular model for the collagen-containing fibrils in the egg case of the dogfish *Scyliorhinus caniculus* 201
— —, a permeability barrier in the testis of an insect *Triatoma:* a freeze fracture and lanthanum tracer study 461
— —, an electron microscopic study of a 'Sertoli-like' cell in the testis of a barnacle, *Balanus* 383
— —, characterization of filaments within the subacrosomal space of rat spermatids during spermiogenesis 887
— —, corpus luteum formation and ovulation in the butterfly, *Calpodes* 783
— —, internalized proteins directed into accumulative compartments of mosquito oocytes by the specific ligand, vitellogenin 559
— —, localization of the lipid intermediate pathway of protein glycosylation of oviduct cell types 241
— —, modulation of cytoskeletal organization during insect follicle cell morphogenesis 741
— —, ovarioles of *Notonecta*, effects of glycerol and freezing on the appearance and arrangement of microtubules in three different systems: a freeze-substitution study 331
— —, Sertoli cell cytoplasts in the semen of the spiny dogfish, *Squalus acanthias* 375
— —, similarly in yolk-platelet structure of an ancient bony fish (*Acipenser*) and an ancient reptile (*Sphenodon*) 117
— —, sperm maturation and ultrastructure in *Scyllarus chacei* 257
— —, structure and formation of the chorion in the butterfly, *Calpodes* 589
— —, the ovaries and changes in their structural components at the end of vitellogenesis and during vitelline membrane formation in the butterfly, *Calpodes* 575
— —, the virgin bursa copulatrix of the butterfly, *Calpodes* 545
— —, ultrastructural and histochemical observations on electroejaculated spermatophores of the palaemonid shrimp, *Macrobrachium rosenbergii* 709
— —, ultrastructural study of oogenesis and yolk formation in an opisthobranch mollusc, *Runcina* 915
— —, zipper-lines in the flagellar plasma membrane of the squid (*Loligo*) spermatozoon 251
Reptile, *Sphenodon*, yolk platelets of 117
Retina, canine, the external limiting membrane in developing normal and dysplastic 231
Ruthenium red, antidiuretic hormone response in the amphibian urinary bladder: time course of cytochalasin-induced vacuole formation, an ultrastructural study employing 685

S

Salivary glands, tick, an immunocytochemical marker for the complex granules of, which traces e-granule shedding to interstitial labyrinthine spaces 765
Scolex, tapeworm, integument of. 1. Freeze-fracture of the syncytial layer, microvilli and discoid bodies 869

Scyllarus chacei, decapod, sperm maturation and ultrastructure in 257
Self-assembly, of structures resembling functional organs by pure populations of cells 313
Sensilla basiconica, fine structure and development of, on the antennae of sphecid wasps 143
Sertoli cell, cytoplasts in the semen of the spiny dogfish, *Squalus acanthias* 375
'Sertoli-like' cell, in the testis of the barnacle, *Balanus*, an electron microscopic study of 383
Spermatids, rat, characterization of filaments within the subacrosomal space of, during spermiogenesis 887
Spermatogenesis, in the decapod crustacean, *Scyllarus chacei* 257
Spermatophores, of the palaemonid shrimp, *Macrobrachium rosenbergii* 709
Spermatozoa, of the spiny dogfish, *Squalus acanthias* 375
Spermatozoon, of the squid *Loligo*, zipper-lines in the flagellar plasma membrane of 251
Spermiogenesis, characterization of filaments within the subascrosmal space of rat spermatids during 887
Spiral artefact, in arthopod cuticle 603, 621
Sponges, the cellular localization of long chain fatty acids in 19
Squid, *Loligo*, zipper-lines in the flagellar plasma membrane of 251
Stereology, quantitative ultrastructural changes of the endodermal cells in the early chick embryo analysed by 63
Subfilaments, nine, in transverse sections of the myosin filament 499

T

T-cell, differentiation of 321
Tapeworm, scolex, integument of the, 1. Freeze-fracture of the syncytial layer, microvilli and discoid bodies 869
Tardigrada, localization of chitin in the cuticle of, using wheat germ agglutinin-gold conjugate as a specific electron dense marker 297
Thymuses, mouse, *in situ* characterization of lymphoepithelial complexes ultrastructurally similar to isolated thymic nurse cells 321
Tissue culture, brain macrophages in cerebellar cell cultures 645
— —, cytoskeletal organization affects cellular responses to cytochalasins: comparison of a normal line and its transformant 175
— —, DNA synthesis of adult mammalian cardiac muscle cells in long-term culture 491
— —, hemidesmosome formation by embryonic chick corneal epithelium *in vitro* 659
— —, influence of plating density on individual cell growth, cell division and differentiation of neonatal rat heart primary cultures 209
— —, mitogen-induced disorganization of capillary-like structure formed by human large vessel endothelial cells *in vitro* 481
— —, patterns of blood-vessel invasion by mammary tumor cells 817
— —, phenotypic and karyotypic transitions in the spontaneous transformation of a, rat cell line 27
— —, receptor-mediated binding of C1q on pulmonary endothelial cells 13
— —, structural changes induced in capillary endothelial cells by growth factors: altered distribution of cytoskeletal elements and organelles in cells spreading in the presence of tumor conditioned medium and hypothalamus derived growth factor 827
Transformation, of a normal cell line: cytoskeletal organization affects cellular responses to cytochalasins 175
—, of a rat cell line, phenotypic and karyotypic transitions in the spontaneous 27
Transpiration, of water through insect cuticle 99
Tropomyosin 27
Tumor cells, mammary, patterns of blood-vessel invasion by 817
Tunicate, *Ciona intestinalis*, morphological and physiological properties of non-striated muscle from: parallels with vertebrate skeletal muscle 341

U

Urinary bladder, amphibian, antidiuretic hormone response in the: time course of cytochalasin-induced vacuole formation, an ultrastructural study employing ruthenium red 685

V

Vitelline membrane, the ovaries and changes in their structural components at the end of vitellogenesis and during formation of, in the butterfly, *Calpodes* 575
Vitellogenesis, in mosquito fat body 125
—, in a opisthobranch mollusc, *Runcina*, ultrastructural study of oogenesis and 915
—, in the insect *Rhodnius prolixus* 741
—, the ovaries and changes in their structural components at the end of, and during vitelline membrane formation in the butterfly, *Calpodes* 575
Vitellogenin, internalized proteins directed into accumulative compartments of mosquito oocytes by the specific ligand 559
—, secretion, lysosomes in the cessation of, in mosquito fat body 125

W

Water vapour, absorption of, by larvae of the oriental rat flea, *Xenopsylla cheopis* 437
Wax, of insect cuticle 99
—, surface, cryo-preservation of 305

X

X-ray microanalysis, of Ca, in the primary muscle of the trunk of *Sagitta setosa* (Chaetognath) 953
— —, pulse discharge of calcium through a demineralizing epithelium in the crustacean *Orchestia:* ultrastructural cytochemistry and 267

Y

Yolk, internalized proteins directed into accumulative compartments of mosquito oocytes by the specific ligand, vitellogenin 559
— formation, ultrastructural study of oogenesis and, in an opisthobranch mollusc, *Runcina* 915
— -platelet, structure of, in an ancient bony fish (*Acipenser*) and an ancient reptile (*Sphenodon*) 117

Z

Zipper-lines, in the flagellar plasma membrane of the squid (*Loligo*) spermatozoon 251
